07.04

The previous day we met up with our hosts at the port and were greeted warmly to their homes. I gave them my gifts and we talked for long. On Monday we went to Heureka where we got to know each other better and had fun experiencing many science attractions. We got to know about the Ice age and cosmos which was very exciting. After that we had lunch and went to shop in the shopping centers. The day was very well spent I'd say.

08.04

This day was the most exciting as we went to the school. The school was very different from ours and so big. We also got to go in one of their classes, for me it was math. I also saw that the students recycled their cans and spend time playing ball games. After that we went to the environmental center as we got to know about the people there and about the work they do. We discussed many differences in our country and theirs and talked about the nature. It was eye-opening and fun. Then we went to Fatzer to get to know about the history and eat as many candies as we could. I would say this was the best part of the day. 09.04 Wednesday was the most fun day of all. We gathered in front of the school and took a bus to the Natural museum. (The whole trip we only used public transport since it's good for the environment) We explored to see many skeletons and animals. It was so mesmerizing to see many species and nature there. We took a lot of photos and then went to Oodi library which was so big and fancy. We ate our lunch and went to spend time in the nearby malls. Then we visited the parliament house as we talked about a bit of history and then went to shop in the second hand stores. I liked it very much. Then we went to eat at a Vietnamese restaurant and went to Kuusijärvi to take a relaxing sauna, we also swam in the lake. I loved how we got along so well.

I was sad since it was our last day but we spent the little time we still had enjoying each other's company and had lessons of our languages. That was very interesting. Later we went and got some ice cream and then it was time to go. We waved goodbye to our friends and hoped to see them again in May.

Here are some pictures:

RUNAR SCHILDTIN PUISTO
Helsinki, Finland

TIKKURILAN KIRJASTO
Vantaa, Finland

HEUREKA
Vantaa, Finland

I would say that the trip was so worth it and we had the best time of our life. If i could i would have stayed for longer. Our group was the best and the whole project was very eye-opening for me. I will definitely take in consider my foot in the world making sure i save as much nature as i can. Thank you!
